

VALITS' PRESS RELEASE 4 - November 2018

## VALITS PROJECT TOOL IS READY TO TEST YOUR SKILLS

The final conference of VALITS project “Skills that pay the bills” – took place in Palma de Mallorca on 2<sup>nd</sup> October 2018 and launched the Validation Tool and Career Guidance App to an audience of young seasonal workers and representatives of employment services.

**VALITS** stands for VALidating Informal Transversal Skills of young workers in seasonal tourism. The main aim of the VALITS project was to promote the cross-sector mobility of seasonal tourism workers through the validation of transversal skills and their matching with suitable sectors and careers that have a demand and skills-needs for those competences.

After a desk research and a field research phase **10 informal transversal skills were identified** by the VALITS partnership as being most valued by employers inside and outside tourism.

### VALITS ready to test your skills

Since the launch at the final conference the **Valits Validation Tool** is online on the project website [www.valits.eu](http://www.valits.eu) and available **for free**. It is a 1-hour skills assessment tool and uses a large variety of interactive and non-interactive tests to detect and grade the user’s informal transversal skills without him knowing which skills are being tested. The assessed transversal skills are then certified and also used to suggest possible career paths where their skills are needed. This led to the development of the Career Guidance App. The **Career Guidance App** supports the cross-sector mobility of seasonal tourism workers and guides the user to full-time work opportunities in different economic sectors where their transversal skill-set is in demand. It also helps to get jobs up the ladder in the same sector with the skills they have developed.

### For whom is VALITS useful

The VALITS tools are very useful for school, career guidance, employment service or other application. Human resources professionals can guide young workers to identify their informal transversal skills by using VALITS.
