The ENGAGE objective is to emphasize the importance of **key competences** and **soft skills** among adults with a view to improve their employment prospects.

FIND OUT OUR LATEST NEWS!

The end of the first year of the Engage project development was full of hard work to provide you the Virtual Platform for Skills Diagnosis and training in future oriented skills, as well as the Matching Portal for connecting skills and labour market needs.

The 2nd Project Meeting taking place in Porto between 4th and 5th June was an opportunity to evaluate current development and establish working objectives for next months. Working sessions resulted in defining the final training methodology.

To provide competencies according to market needs the project will cover contents within 8 specific future oriented areas:

- Creativity
- Logical thinking
- Observation and Perception
- Empathy and Emotional Intelligence
- Innovation Mindset
- Open Minded Status
- Teamwork/Valuing Ideas
- Taking Initiative

“ENhancinG Adults key competences to promote and encouraGe effective cooperation between Education and labor market”, project number: 2017-1-RO01-KA204-037236

WHAT ARE THE MAIN ASPECTS?

- ✓ The introduction of Future Soft Skills: the project will identify and improve soft skills which will be important in the future.
- ✓ The adaptive training: the project will profile the learners to identify gaps in soft skills and deliver a personalised training path based on the skills gap of individual learners.

PROJECT OUTCOMES

Virtual Platform for future skills diagnosis and improvement

Matching Portal for connecting skills and labour market needs

Motivation of low-skilled young adults through a participatory approach

LTTA - Livorno

Following an intensive period of contents development, the Engage project team met in Livorno between 15th and 19th of October to exchange knowledge and practices and work on improvements to initial training contents. The week of working sessions marks an initiation of internal testing phase for IO1 after which the results will be available for testing by our stakeholders.

During the meeting we had opportunity to take advantage and exchange practices regarding matching portals during a presentation of Regione Toscana portal for job demand and supply matching. It allowed us to obtain insights into the specific limitations of current solutions and the stakeholder challenges. Engagement of the Toscana Region in the discussion on the Engage matching portal development provided us with important practical pointers to be incorporated in the final shape of Matching Portal.
