Boosting a novel and innovative tRAining approaCh of Key Enabling Technologies

BRACKET INFO

The BRACKET project is a study of the representation of new technologies (nanotechnology, biotechnology and advanced materials) in Vocational Education and Training (VET). In the scope of the project, the situation analysis in the project partner countries will be carried out, as well as the preparation and implementation of a new training program in the field of key advanced technologies and a joint platform for cooperation containing all educational content developed through the project.

November 1, 2018 - April 30, 2021

WHAT HAS BEEN DONE SO FAR

PROJECT ONLINE PARTNER MEETING

On 20th November the Consortium of BRACKET held the 5th project partner meeting which was scheduled to take place in Slovenia, but due to Covid-19, it was held online.

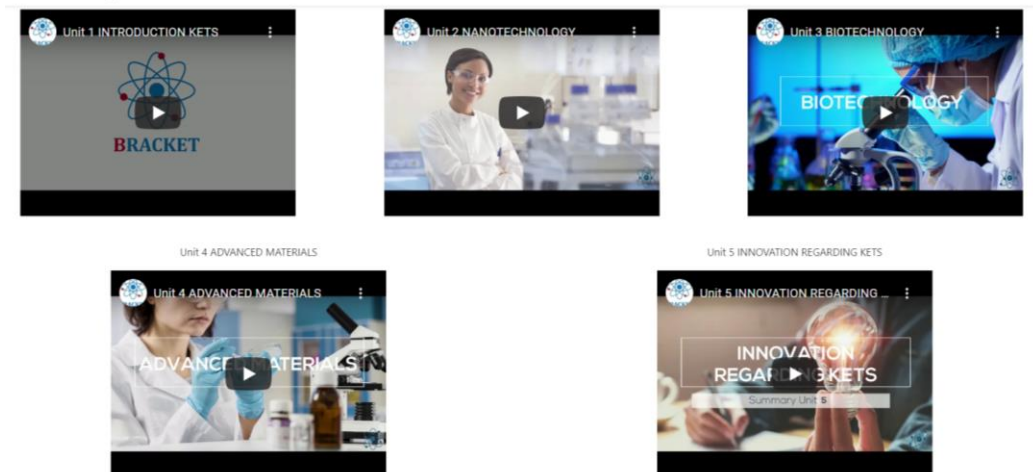

The purpose of this meeting was to summarize all the activities completed within IO3 and to agree on the next steps and deadlines in order to finalize the content of the training materials that will be available on an online learning platform. Also, partners discussed the launch of the pilot testing of the training course and multiplier events that will be held in each of the partner countries this year in April.

BRACKET VIDEOS ON YOUTUBE

Before you start your BRACKET training, we propose to first start learning with BRACKET introductory videos. The project Consortium have developed five videos of each learning unit: KETs introduction, Nanotechnology, Biotechnology, Advanced Materials and Innovation regarding KETs.

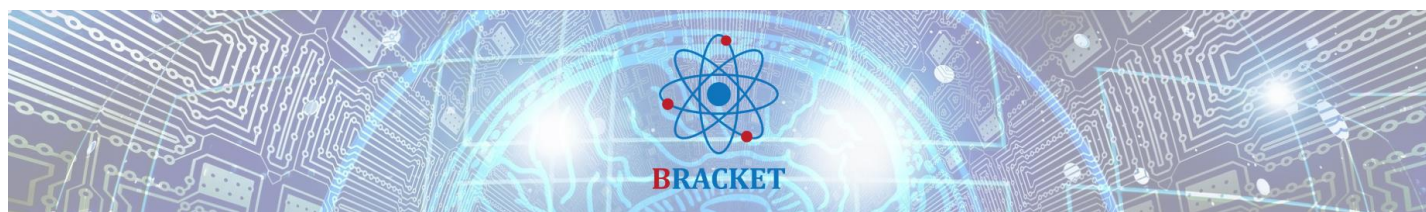

You can find all the videos in English on [BRACKET ERASMUS PLUS PROJECT YouTube channel](#) with available subtitles in Croatian, Spanish, Slovenian, Greek, Polish and Latvian.

ACTIVITIES IN THE NEXT PERIOD

- Real Verification of the BRACKET training course
- The Final conferences in all the partner countries in April 2021
- The final Transnational Project Meeting will be held in April 2021

LEARN MORE ON THE TOPIC VIA THE BRACKET ONLINE COURSE!

BRACKET Consortium offers a freely available BRACKET e-learning course related to Key Enabling Technologies, specifically nanotechnology, biotechnology and advanced materials. It is adapted to the future trends and needs of the whole society in terms of enabling technologies, thus, it will reinforce the vocational education and training of the target groups and review those key competences and skills needed for providing indispensable technological elements for the development of a wide range of new materials, products, processes and services with greatest added value. The training course is designed for VET students, workers and managers of industries, experts in education and research centres encouraging to focus their profession in technological innovation and research fields.

When you end the BRACKET E-Learning Platform you will have the possibility to upskill in different units (KETs introduction, Nanotechnology, Biotechnology, Advanced Materials and Innovation regarding KETs), being independent from each other and avoiding redundancies among them. Each of these units is divided into an introductory video, preface, introduction and learning

outcomes, followed by main training content, a supporting presentation and consolidation questions. Presentations and training content can also be downloaded to the desktop, so you can make use of them also offline. After the completion of all units, it is recommended that users proceed to a final evaluation test. On the basis of results obtained in the evaluation test, the system generates personalized certificates with the achieved score. An additional part of the e-learning is a forum, dedicated space for sharing best practices and experiences.

The BRACKET online training is available for free after registration. This training is available in seven different languages: English, Croatian, Spanish, Slovenian, Greek, Polish and Latvian.

Interested? Explore the treasures and continue to the training!

We invite you to take part in Real Verification of the BRACKET training course!
